

William Tway

ct38841n@pace.edu | (203)-914-4195 | connortway.github.io | in/william-tway-90895a2b3 | New York, New York

SKILLS

- Java, TypeScript, JavaScript, HTML/CSS, Python, C++, Kotlin
- React, React Native, REST APIs, Firebase, Supabase, SQL
- Git, AWS, Flask, Bootstrap, Azure, Figma

PROFESSIONAL EXPERIENCES

Front End Developer	New York, NY
Celestronics	October 2024 – Present
• Built mobile-friendly frontend pages using React Native and React Native Paper for clean, consistent UI. • Integrated Supabase for real-time data handling through API calls to fetch and store user data. • Participated in daily Scrum meetings, offering ideas and suggestions to improve features and user flow. • Collaborated with the team to develop reusable components and maintain design consistency across screens.	

PROJECTS

VineVault – React Native App	
Personal Project Tech Stack: React Native, Typescript, Supabase	May 2026
• Architected and developed a cross-platform mobile application utilizing React Native and TypeScript to support a unique wine mystery-pack business model and inventory vaulting system. • Designed and implemented robust database schemas to accurately track, manage, and evaluate vaulted wine inventories and rare vintages. • Delivered a clean, minimalist, and professional UI/UX, ensuring a highly readable and distraction-free environment across both iOS and Android platforms.	
Google Colab Project – Fender Stratocaster Price Modeling	
Math Concepts for Machine Learning	December 2025
• Developed a Python-based data processing and modeling pipeline to analyze how guitar specifications influence market value across 2,100+ listings. • Trained and evaluated Linear regression and Random Forest Regression models. • Identified and visualized the most influential product features driving resale price using automated analysis tools.	
ChefAI – Android App	
Mobile App Development	April 2025 – May 2025
• Built an Android app in Jetpack Compose that generates custom recipes using the ChatGPT API. • Designed dark/light mode UI and structured navigation across screens. • Implemented user input fields for ingredient handling and coordinated API integration.	
Herbarium – React App	
Software Engineering	March 2025 – May 2025
• Designed and developed a responsive plant identification app using Figma, React, and Bootstrap. • Leveraged 3rd Party APIs to Extract metadata from uploaded images, identify plants, fetch biological info, pin plant location on Google Maps. • Used Firebase Firestore to store images and image data and display info in user’s “herbarium.”	

EDUCATION

Pace University	New York, NY
Bachelor of Science in Computer Science, <i>cum laude</i> . GPA: 3.55/4.00	December 2025
Dean’s List - First Honors Fall 2024 & Spring 2025 Second Honors Fall 2025 & Fall 2023 Third Honors Spring 2021 & Fall 2021
